

Experiment 18

Create a Storage service using any Public Cloud Service Provider (Azure/GCP/AWS) and check the public accessibility of the stored file to demonstrate Storage as a Service

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and user information. The main content area is titled "Storage accounts" and displays a list of three storage accounts. The table has columns for Name, Type, Kind, Resource group, Location, and Subscription. The accounts listed are "cricketer", "csg1003200306cd551f", and "hemanth642". Each account is a Storage account of kind StorageV2, located in South India, and associated with the "Azure for Students" subscription. The interface includes filters, a "Filter for any field..." input, and pagination controls at the bottom.

Name	Type	Kind	Resource group	Location	Subscription
cricketer	Storage account	StorageV2	hemanth	South India	Azure for Students
csg1003200306cd551f	Storage account	StorageV2	cloud-shell-storage-centralindia	Central India	Azure for Students
hemanth642	Storage account	Storage	hemanth642	South India	Azure for Students

Create a storage account

Running final validation...

Basics Advanced Networking Data protection Encryption Tags Review

Basics

Subscription	Azure for Students
Resource Group	hemanth
Location	southindia
Storage account name	hemanth642640
Deployment model	Resource manager
Performance	Standard
Replication	Read-access geo-redundant storage (RA-GRS)

Advanced

Enable hierarchical namespace	Disabled
Enable network file system v3	Disabled
Allow cross-tenant replication	Disabled
Access tier	Hot
