

Experiment 1

Create a simple cloud software application and provide it as a service using any Cloud Service Provider to demonstrate Software as a Service (SaaS).

The screenshot displays the Zoho Creator interface for editing a form titled "passenger info" within the "flight reservations" application. The interface is divided into several sections:

- Basic Fields:** A panel on the left showing various field types available for selection, including Name, Email, Phone, Address, Date, Time, Single Line, Multi Line, Number, Drop Down, and Time.
- Field Properties:** A panel on the right showing the configuration for the selected "departure time" field. It includes options for Field name, Field link name, Validation (Mandatory, No duplicate values), Initial value (set to "2 hrs"), Character maximum (set to 255), Data Privacy (Contains personal data), and Data Security.
- Form Preview:** The bottom section shows a preview of the "passenger info" form. It includes fields for Name (First Name: charan, Last Name: k), Email (charan123@gmail.com), Phone (+91 89192 83558), Date (01-Oct-2023), Time (04:56:37), from (bangalore), to (kolkatha), and departure time (2 hrs). The form has "Update" and "Cancel" buttons at the bottom.
