

## Experiment 3

Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS

The image displays two screenshots of the Zoho Creator application builder interface, showing the configuration of a property buying and rental process.

**Top Screenshot: Buyer Form**

- Basic Fields:** Name, Email, Phone, Address, Date, Time, No of cents, Cost of 1 cent, Formula.
- Field Properties:** Field name (Name), Field link name (Name), Validation (Mandatory), Display Fields (First Name, Last Name, Prefix, Suffix), Data Privacy.

**Bottom Screenshot: Rental Form**

- Basic Fields:** Name, Email, Phone, Address, Date, Time, No of cents, Cost of 1 cent, Days of rent, total cost.
- Field Properties:** Field name (Cost of 1 cent), Field link name (Cost\_of\_1\_cent), Currency type (INR India Rupees), Display format (12,34,567.89), Validation (Mandatory, No duplicate values), Initial value (Initial value), Max Digits (10).

The screenshot shows a web browser displaying a Zoho Creator application. The URL is `creatorapp.zoho.in/hemanth1094.sseaveetha/property-buying-and-rental/#ReportRental_Report`. The application is titled "property buying and rental" and is in a "Rental Report" view. The report shows one entry for a property named "charan k".

Name	Email	Phone	Address	Date	No of 1 cents	Cost of 1 cent
charan k	charan123@gmail.com	+918919283558	crt, ctr, krm, ap, 2442, India	20-Oct-2023	200	₹ 5,000.00

The application interface includes a sidebar with navigation options: "Buyers", "Rental", and "Rental Report" (which is currently selected). The bottom of the screen shows the user's profile "hemanth1094.sse" and a notification bell icon. The status bar at the bottom indicates "Showing 1 of 1".
