SSH using Azure CLI

Connect from the Azure portal

Connect from your local machine

- 1 Configure prerequisites for SSH using Azure CLI
Azure needs to configure some features in order to connect to the VM.

Validating prerequisites before configuration

- System assigned managed identity
Azure will configure a system-assigned managed identity in order to enable the Azure AD login extension. [Learn more](#)
- Azure AD SSH Login Extension
Validating Azure Active Directory based SSH Login extension. [Learn more](#)
- Virtual machine user or administrator login
Validating virtual machine administrator login role on the resource group. [Learn more](#)
- Port 22 access
Validating access to port 22 on the virtual machine. [Learn more](#)
Change the port for connecting to this virtual machine on the Connect page of the virtual machine.
- Public IP address: 4.240.91.92
A public IP address is required to connect via this connection method.

Validating...
